

ECOPLANK

(RE) fresh • (RE) style ... real wood décor

Glue and Stick system that guarantees fast and easy application!

EcoPlank is the fastest, easiest and most amazing way to (re) fresh and (re) style any space - the possibilities are endless!

EcoPlank is 100% WOOD – beautifully aged and distressed, giving you the rustic look and feel of reclaimed wood. EcoPlank is skillfully handcrafted, using aging and weathering techniques to make new wood look old, distressed or weathered, therefore each wooden panel is unique in character and colouring, highlighting your wall with darker and lighter shades and tones.

EcoPlank is packaged in 2.5 square metres which consists of 15 wooden panels, measuring 1.2m long and 140mm wide. These panels can easily be cut into any size, considering it is only 4mm thick.

Now you can create your own pattern, be it chevron, zig-zag, vertical or horizontal, there is so much you can create with EcoPlank. Add warmth and texture to any bland wall instantly! Just glue and stick and say hello to the transformation!

Why use laminated flooring on walls when you can have 100% real wood? The difference is obvious to the eye and warm to the touch - and so affordable! Express your style and make your interior look more natural.

We also offer the DIY enthusiast the chance to create their own paint effect or technique to match their interior or project. Create your own customised wall by mixing and matching different colours together OR add highlights by dry-brushing your own paint colour onto EcoPlank.

African Hardwoods such as: Rubberwood, Oak, Teak or Kiaat as well as 100% Reclaimed Wood are also available on request.

Use it on walls, headboards, table tops, cupboard doors, internal doors, mirror surrounds and much more!
